Dear Mama,

We started hydraulics yesterday. I believe it is going to be interesting. It's a lot like General Science was in high school. It sure is going to take a lot of studying. You asked if I had enough cover. The barracks have an automatic heating system and I seldom use over one blanket but I have two blankets and a comfort if I need them. It's a lot warmer today. We have schools in the new buildings now. They sure are pretty. How is Lake View doing in basket ball? What's Richards address? The boy that sleeps by me is about to stone to death for some cookies and
2 on too.
