Over near England there is a little island called the "Isle of Man". A peculiar thing about the people of the island is that they do not believe in riding automobiles so they all ride donkeys or what are commonly called asses. Every one has an ass, some have just ordinary asses, some have white asses and some have black asses. The Mayor has an ass no one would look at even once, but the mayor's wife has a beautiful ass. People who really know asses say she has one of the biggest and finest asses they ever seen; men stop her as she goes to market just to pat her ass.

On Sunday they all go to church on their asses; some of the boys ride the girls asses and some of the girls ride the boys asses. One day the preacher had to leave early following the service and he thought he better have his ass handy so he tied it outside the window. During the service a fire broke out and of course everyone ran to save his ass. The preacher jumped out the window expecting to land on his ass but there was a big hole and he fell into the hole instead. This goes to prove that even a preacher doesn't know his ass from a hole in the ground.
