Dear Mama,

I don't know anythang [sic] much to write because nothing has happened. We had school yesterday to make up for Friday when we had the review. I hope to be off next Sunday if possible.

I went to church at the post Chapel yesterday morning. It was full and there was some standing in the back but the chapel isn't very big and the seats are uncomfortable. The chapelin was a good preacher.

I moved again this morning to the next barracks. I got upstairs this time and I sure like it better.

It rained here yesterday and turned cold this morning but is still cloudy. There is one boy here from Miss. who says March is the worse month for rain and cold weather.

We are studying the the [sic] airplane electRICT [sic] system now. It may be pritty [sic] hard. After we finish this, we go into carburation then we have ten days is testblocks. The rest which is 20 days is working on planes. Where then anybody knows. After we get in test blocks we change scagulo [schedule?]. They have four six hour shifts. One starts at 1 o'clock is the morning till 7 o'clock. I don't know which I will get on but I hope I'm from 7 in the morn [sic] till 1 in the afternoon but I don't guess there is a choice.

It's nearly time for dinner so I got to close.

Norman
